MIRROR CABINETS  
LIGHT MIRRORS

KEUCO

## ROYAL LUMOS

More light is not possible. An all-round LED light frame makes ROYAL LUMOS a real highlight in the bathroom - whether as an illuminated mirror or a mirror cabinet.

### LED

Particularly efficient LED light sources

### Adjustable light colour

Infinitely variable from cosy warm white to daylight white (2700 to 6500 Kelvin)

### Dimmable

Infinitely dimmable light intensity

### Light scenes

Different light sources offer all options for every time of day and mood

### Touch sensor system

Intuitive sensor control is seamlessly integrated into the frame

### DALI lighting control

Products can be optionally networked using the DALI standard

### Aluminium

Body / frame made of very stable anodised aluminium

### Mirror heating

Optionally equipped with a mirror heater for a clear view after showering

## MIRROR CABINETS

**Design decision.** In addition to the iconic design with an open storage compartment, the ROYAL LUMOS is also available with a particularly large mirror surface that conceals the compartment behind it. The wall-mounted and built-in versions offer plenty of scope for modern bathroom architecture.

**Variable organisation.** High-quality interior fittings with glass shelves, soft-close hinges, the illuminated storage compartment with linoleum insert, mirrored rear panel, mirrored hinged doors on the inside and power sockets make the ROYAL LUMOS a popular everyday companion.

Please note: The sockets shown are continental sockets and may vary in country specifications.

**Integrated control.** The light sources of the brightest mirror cabinet in the KEUCO range can be dimmed and the light colour infinitely adjusted using the intuitive sensor control. The optional mirror heating is also switched on via this control.

**Luminous staging.** The surrounding frame forms the main lighting. The compartment lighting puts your favourite products in the right light and the washbasin lighting turns the mixer tap into the star of the wash area.

## LIGHT MIRRORS

**Harmonious image at the washbasin.** The ROYAL LUMOS illuminated mirror offers maximum light for luxurious, high-quality bathroom design. The all-round frame adorns the washbasin in black or silver anodised.

**Perfect light and practical warmth.** Two LED light sources for the main lighting and washbasin accent lighting can be intuitively dimmed and the light colour infinitely adjusted. The ROYAL LUMOS illuminated mirror is optionally available with practical mirror heating.
