## AVENO

Complementing your style with style. AVENO products are designed according to the principle “form follows function”. “Stripping things back to just a few geometric elements creates an subtle calmness,” explains designer Bernd Schriefer. The products can be both screwed and glued in place. Installation using the powerful adhesive is simple, fast and straight-forward.

## ACCESSORIES FOR WASHBASINS

**Beautifully functional.** The products' tapered mounting solutions come straight out of the wall for perfect functionality. As a result, the adhesive-mounted accessories have a calm, contemporary wall connection without unnecessary indentations or additional elements or rosettes.

**Stable mounting.** The hinged towel ring is designed to keep the towel away from the wall for air drying. The towel rail is available in two lengths, meaning there is room for several towels.

## ACCESSORIES FOR THE TOILET

**Perfectly equipped.** The sturdy toilet paper holder is equipped with a roll brake to prevent the toilet paper from unravelling uncontrollably. The high-quality glass brush container has a removable insert and can be easily cleaned.

## ACCESSORIES FOR THE SHOWER

**Practical storage.** Both a rectangular model and a corner version of the shower shelf are available for the shower area – each with or without a glass wiper in matt white or matt black. The shower shelf is made from a single piece of aluminium. The solid material defies the water in the shower and does not lose any of its perfect appearance, even after a long period of use.

## SAFE AND EASY BONDING

**Apply the adhesive, press on and you're done.** The KEUCO adhesive set for AVENO accessories impresses with its very easy application.

[1] The adhesive set contains a cleaning cloth and an abrasive cloth. The brushed surface helps the adhesive to stick even better.

[2] Clean the adhesive surface on the product before applying the adhesive.

[3] Clean the bonding surface on the wall thoroughly before bonding.

[4] After finalising the product's position, mark the mounting points.

Press the complete contents of the adhesive stick onto the mix pad\_and mix with the spatula until you achieve an even mixture and colour.

Then use the spatula to apply the adhesive directly to the accessory's wall connection.

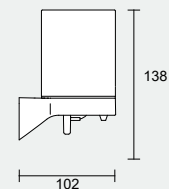

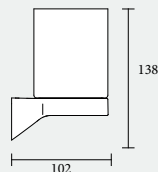

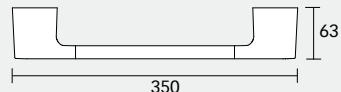

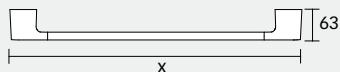

Press onto the wall in the desired position. Allow the adhesive to cure for at least four hours using the cardboard to secure it.

Finally, attach the product, secure with the grub screw and the assembly process is complete - all without any drilling.
