

IXMO

Shower & bath tub sets

Price List 2026

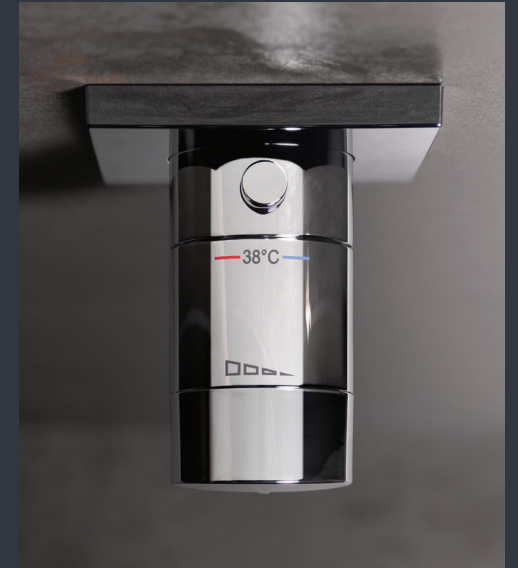

Prices RRP ex. vat, valid from 1st April 2026

Welcome to IXMO

Nothing is more difficult than making complexity seem simple.

Whatever you are planning – a private ambience, a hotel bathroom, a wellness oasis, or a barrier-free application for people with reduced mobility – IXMO always has the perfect solution, ensuring a maximum in planning freedom to make it a success.

Our IXMO products are made in our own production facility in Hemer. Minimalism "made in Germany", with maximum quality standards.

Finishes

For a number of decades, KEUCO's success has been based on the high quality of its products. In particular, the carefully crafted surfaces and their durability make a decisive contribution to the standard of quality.

01

Chrome-plated

Galvanising

The classic in high gloss

Timelessly shiny, hygienic and versatile – chrome fits into any bathroom and remains a trusted standard for decades.

17

Aluminium-finish

Galvanising

Immaculate purity

The closed, pore-free surface is hygienic, easy to maintain and impresses with a clear impression of technical perfection.

03

Brushed bronze

PVD

Tradition meets technology

The warm bronze look with modern PVD coating combines traditional quality with contemporary durability.

06

Stainless steel-finish

PVD

High-tech understatement

Matt, understated and highly durable – a surface finish that perfectly complements modern architectural styles.

13

Brushed black chrome

PVD

Robust and distinctive

Dark, brushed and extremely durable – the perfect choice for the shower hose who wants to combine design and durability.

25

Brushed brass

Gold plated

Timeless quality

Brass finished with 23.5 karat gold imparts a cosy warmth and is particularly effective in classic or creatively mixed settings.

29

Brushed red gold

Gold plated

Sensuous precious metal

A 20-carat proportion of real gold underlines exclusivity and brings a touch of luxury to the bathroom architecture.

37

Black matt

Lacquer

Powerful accents

With its clear, matte colour, black creates an uncompromising modern aesthetic that graphically defines spaces.

Less can do more

Combining functions produces a completely unique design approach. Together with KEUCO developers, the designer Dominik Tesseroux (Tesseroux+Partner) created a multiple award-winning design icon.

The reason why IXMO's design is so consistently minimalistic is because the functionality is so compactly integrated.

More freedom to be individual

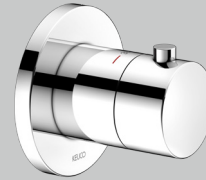

In addition to in-wall solutions for shower and bath tub, the product family was systematically expanded to include fittings for washbasin and bidet. Together with the extensive shower accessories, the result is a consistently minimalistic design throughout the whole bathroom, for a maximum in creative freedom.

IXMO permits very individual arrangements on the wall, and offers an extensive range of accessories. For ease of planning, KEUCO offers a clearly arranged configurator, which produces a result in only a few steps.

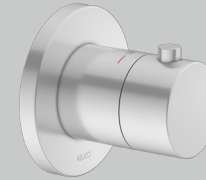

IXMO Shower set 7 (round)

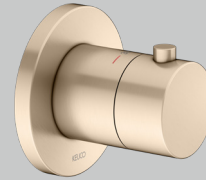

- Thermostatic mixer
- 2-way stop & diverter valve with wall outlet for shower hose and hand shower bracket
- Round pencil hand shower (single function)
- Overhead shower 250 mm

Technology

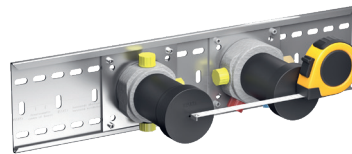

Mounting rail

A real problem-solver for installers: A special installation rail is available for IXMO. It can be positioned horizontally or vertically. The functional parts can be moved to any position on the rail and fixed in place with the screws.

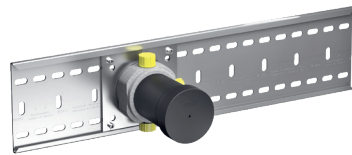

In all modules the temporary plugs have the same diameter, so they can be used for adjustments with a spirit level. If the mounting rail is used, the rail is aligned. The functional parts are aligned automatically once they are hung in the rail.

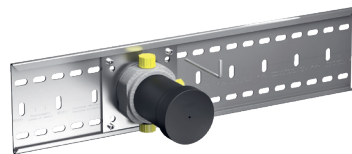

The temporary plugs have register marks on the front, with the help of which the distance between modules can be precisely measured. On the rail the functional parts can be shifted by any amount.

All modules can be flexibly installed in a 360° range, with the exception of the single-lever mixer. The mounting rail can be used in either a horizontal or vertical position.

The functional unit can be finely adjusted with the threaded pins in such a way that it is aligned perfectly against the wall at right angles. When the mounting rail is used, the threaded pins are used to fasten the modules to the rail.

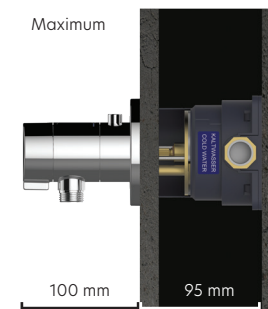

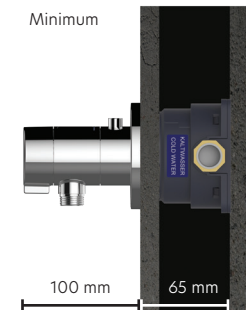

IXMO_solo depth compensation

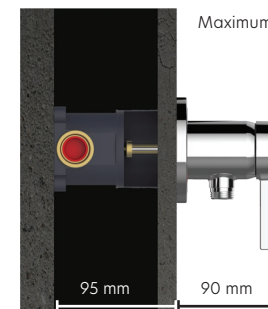

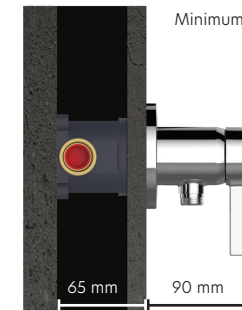

The single-lever mixer projects out from the wall exactly 90 mm and the thermostat 100 mm. The in-wall installation units are easy to install in thin walls or during subsequent modernisation work. The remarkably shallow minimum installation depth of 65 mm makes this possible.

And thanks to the intelligent depth-compensation feature, it can be flexibly adjusted by any amount from 65 to 95 mm.

Thermostat

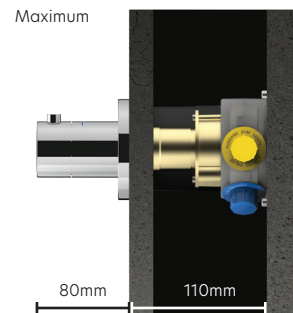

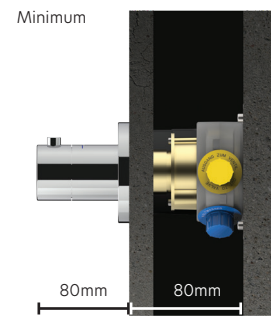

Single-Lever Mixer

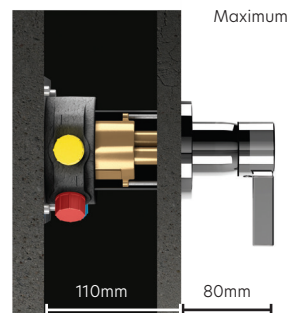

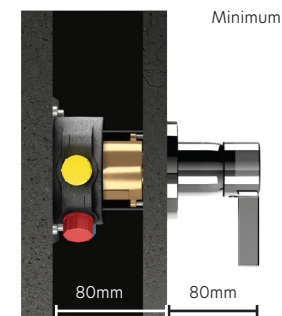

IXMO Depth compensation

The intelligent depth compensation feature of IXMO fittings can be finely adjusted for installation depths anywhere from 80 to 110 mm. The distance the single-lever mixer and the thermostat project out from the wall is always 80 mm.

Thermostat

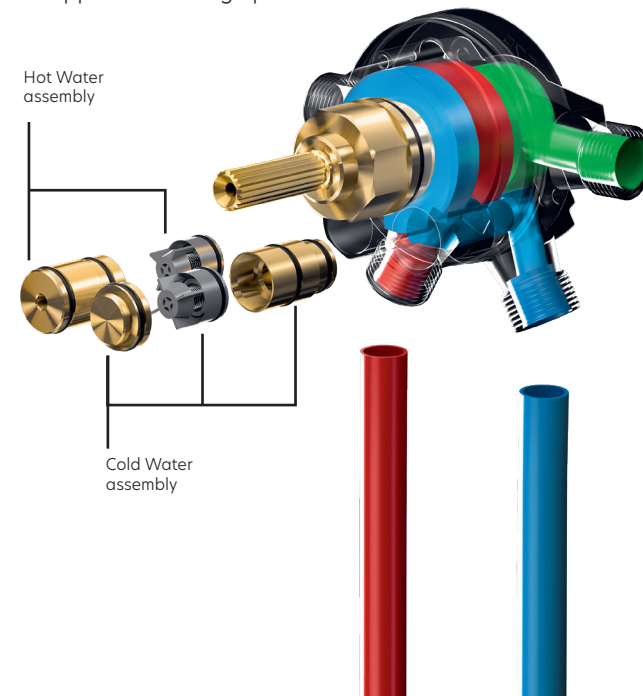

Single-Lever Mixer

Interchanged waterways

In cases where the water pipes are interchanged in the bathroom, no additional adapter needs to be acquired. This is because IXMO thermostats have an integrated solution, which allows the assemblies to be simply swapped in the rough part.
