Everything finds its place

RenoMag – Magnetic, practical, flexible fixing

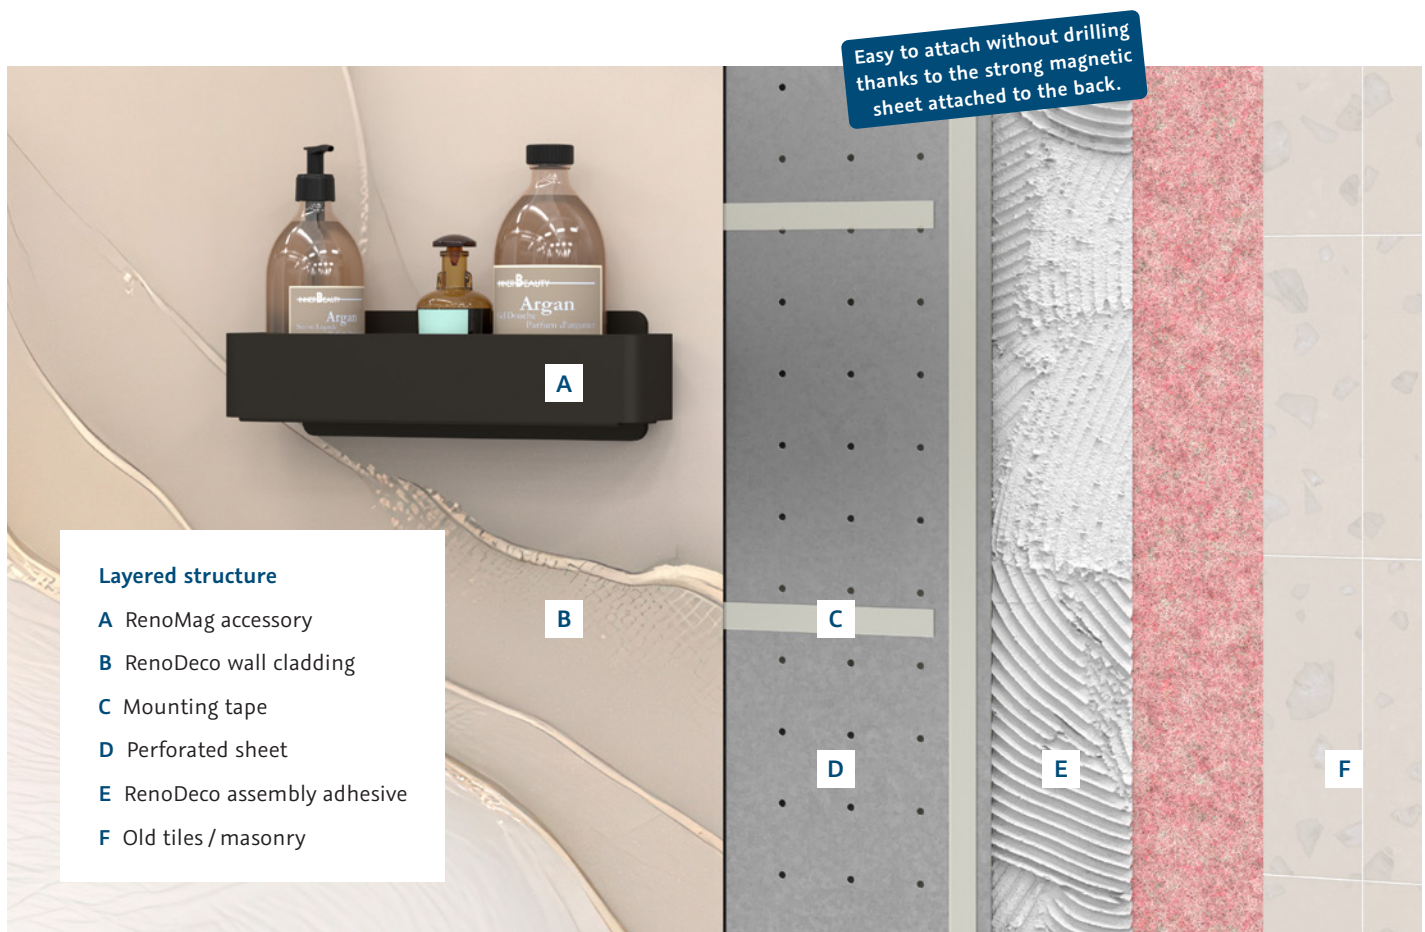

RenoMag adds innovative, practical magnetic accessories to the popular RenoDeco wall cladding concept. The highly magnetic accessories adhere to the RenoDeco wall cladding thanks to a sheet attached to the back. The user can place them flexibly on the wall, creating order around the shower area. No time-consuming drilling or gluing is required.

Depending on the bathroom situation, there is a choice of six utensils in three trendy colours.

The Plus points

- + Secure hold without drilling or gluing – thanks to magnetic force
- + Wide range of products suitable for use in the shower, at the washbasin or by the bathtub
- + Flexible positioning for users with different needs
- + High-quality, stable material made of metal with a modern look
- + Easy addition or removal of accessories
- + Removable for easy cleaning of the wall cladding or the accessories themselves
- + Three product colours for greater design variety in the bathroom

Layered structure

- A RenoMag accessory
- B RenoDeco wall cladding
- C Mounting tape
- D Perforated sheet
- E RenoDeco assembly adhesive
- F Old tiles / masonry

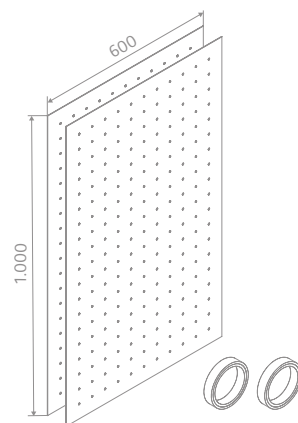

PERFORATED SHEET SET FOR RENOMAG ACCESSORIES

Article no. **100050**

- Perforated sheet set for installation behind RenoDeco wall cladding
- High magnetic adhesion

Set Content

- 2 × galvanised perforated sheet, 600 × 1,000 × 1.5 mm (W × H × D)
- 2 × Mounting tape

Simple installation thanks to the magnet system

The separately available perforated sheet set includes two magnetic perforated sheets measuring 100 × 60 cm and special mounting tape. This allows the sheets to be attached quickly and securely to the back of the RenoDeco wall cladding. Then, the popular aluminium composite panels are mounted on the wall sealant as usual using mounting adhesive. The chosen RenoMag accessories can then be flexibly positioned on the magnetic surface.

Colours

- Chrome (02)
- Black matt (68)
- Brushed gunmetal (280)

UNIVERSAL HOOK

Article no. **100051**

- 45 × 97 × 45 mm (W × H × D)
- Load capacity up to 3 kg

Technical data without guarantee.
Subject to changes.

Pacemakers and implanted defibrillators are modern, reliable devices that provide reliable support in your everyday life. However, to ensure that they function optimally, it is advisable to avoid strong magnetic fields. Powerful magnets can interfere with their function. People with such implants should keep a sufficient distance from magnets to prevent them from malfunctioning. Please warn wearers of these devices.
