More information
at [keuco.com](https://www.keuco.com)

For a number of decades, KEUCO's success has been based on the high quality of its products. In particular, the carefully crafted surfaces and their durability make a decisive contribution to the standard of quality.

All series

01 Chrome-plated

Galvanising

The classic in high gloss

Timelessly shiny, hygienic and versatile – chrome fits into any bathroom and remains a trusted standard for decades.

Page 14

37 Black matt

Lacquer

Powerful accents

With its clear, matte colour, black creates an uncompromising modern aesthetic that graphically defines spaces.

Page 40

25 Brushed brass

Gold plated

Timeless quality

Brass finished with 23.5 karat gold imparts a cosy warmth and is particularly effective in classic or creatively mixed settings.

Page 40

29 Brushed rose gold

Gold plated

Sensuous precious metal

A 20-carat proportion of real gold underlines exclusivity and brings a touch of luxury to the bathroom architecture.

Page 30

13 Brushed black chrome

PVD

Robust and distinctive

Dark, brushed and extremely durable – the perfect choice for those who want to combine design and durability.

Page 30

03 Brushed bronze

PVD

Tradition meets technology

The warm bronze look with modern PVD coating combines traditional quality with contemporary durability.

Page 40

06 Stainless steel-finish

PVD

High-tech understatement

Matt, understated and highly durable – a surface finish that perfectly complements modern architectural styles.

PLAN / PLAN BLUE

07 Stainless steel

Solid

Authentic strength

Pure material without coating: brushed stainless steel impresses with its honest feel, maximum robustness and design integrity.

P LAN BLUE / ILOOK_MOVE

17 Aluminium-finish

Galvanising

Immaculate purity

The closed, pore-free surface is hygienic, easy to maintain and impresses with a clear impression of technical perfection.

PLAN / PLAN CARE / AXESS

17 Aluminium silver-anodized

Solid

Pure hygiene

Anodised aluminium combines lightness with cool elegance and is particularly suitable for reduced, functional environments.

More information
at keuco.com

Design without compromise. The EDITION 11 fittings, available for all areas of the bathroom, combine slim contours and clear geometric shapes with elegant sensuality and a wide variety of variants. Flawless surfaces and the highest workmanship quality make them central elements of the interior design concept.

Surfaces

Chrome-plated

37

Consistently stylish

As an ideal complement to the EDITION 11 fittings, KEUCO also offers the matching EDITION 11 accessories. They can be used in all areas of the bathroom – washbasin, shower, bath tub, toilet, or bidet – and create a consistently harmonious overall appearance.

Coherent overall concept

The EDITION 11 bathroom furniture combines timeless design with high functionality. Clean lines, refined surfaces and well-thought-out storage solutions make them a stylish centrepiece in the bathroom. When combined with the fittings and accessories from the series, this creates a cohesive concept – from design to everyday use.

Fine additions

The EDITION 400 from KEUCO stands for exceptional variety and offers a wide range of accessories. They can be used to create specific accents that stylishly enhance any bathroom design and refine it to the finest detail.

Practical detail for comfort

A high-quality iLook_move cosmetics mirror is the ideal addition to the EDITION 400 bathroom equipment. With its five-fold magnification, it offers the highest level of comfort and proves to be indispensable whenever particular precision and close vision are required.

Online plans

How many functions should there be? Is a thermostatic fitting or operation via a single lever mixer preferred? Are chrome-plated fittings the best fit for your bathroom interior or should they be black matt?

These and other questions are asked step by step during configuration with the IXMO online planner from KEUCO, with the aim of developing the perfect planning for the individual shower or bath solution.

ixmo.de

IXMO as a complete package

The IXMO mixer tap solutions are also available as a complete set – for example for two outlets with Single lever mixer, diverter valve, shower hose, hand shower and shower head, including rough part. Particularly practical: The mounting rail is also included and ensures precise installation.

Conscious water consumption

PLAN BLUE helps to save water and energy – for example, by limiting the flow to five litres per minute for the flush-mounted single lever basin mixer. The fittings are also characterised by a timeless and durable design. That allows them to harmonize with different interior styles and makes them universal when it comes to use in bathroom design.

Planning freedom in series production

The PLAN equipment concept offers maximum flexibility for bathroom design and adapts to a wide range of lifestyles. Thanks to the exceptional width and depth of the range, individual solutions can be realised in almost unlimited numbers.

Coordinated design language

With the EDITION 11, KEUCO offers a consistent design concept for the entire bathroom: Fittings, accessories and bathroom furniture are perfectly coordinated. This creates a harmonious interplay of form, function and material that creates a uniform, aesthetic sense of space.

Set individual accents

The EDITION 11 stands for well thought-out design. Whether for a washbasin, bidet, shower, or bath tub, there is a suitable fitting for every application. Fine surfaces and clear shapes open up room for personal design.

Versatile application

The EDITION 400 aluminium shower shelf is made from a single piece and is available in two variants: as a space-saving corner solution or in the standard version. Both versions are optionally available with or without integrated glass wiper and thus offer maximum flexibility for the bathroom.

Diverse product range

The right solution for every bathroom: The EDITION 400 fittings combine function, form and variety – from the washbasin to the bath tub. High-quality surfaces and harmonious designs offer plenty of room for personal expression.

Chrome-plated
01

Design classics

The design roots of the series date back to 1967. ELEGANCE brings high quality into the bathroom today, which is reflected in its shape, but also in the best materials and meticulous workmanship.

Function meets elegance

The ELEGANCE 90° angled grab bar provides secure support in the shower or toilet. It is available with either a left or right hand-rail. With a load capacity of up to 115 kg, it guarantees reliable support and stability - see chapter Universal Care Items.

Universal design with attention to detail. The practical little helpers in the bathroom: They may not be front and centre, but if they weren't there at all, you would miss them. This is the only way to create comfort in everyday life and a coherent overall picture. REVA accessories are the perfect choice for the rounded bathroom concept.

Type of fixing

For screwing

Mounting sets are included.

For bonding

Please order adhesive set separately.

Surfaces

Chrome-plated
01

Black matt
37

Adhesive set for optimal adhesion

To ensure that the REVA accessories can be securely mounted using the special adhesive, some items in the adhesive set include special rosettes. They ensure a stable surface on which the powerful adhesive adheres optimally.

To conclude

IXMO PURE sink mixer taps rely on classic design beauty with their round, straight outlet projection and rectangular handle. Minimalist curves paired with clear contours create a modern look that perfectly complements the bathroom design with REVA accessories.

Everyday heroes with a strong design. Accessories from the PLAN series are popular worldwide and have proven themselves millions of times over. In hotels, public buildings and private bathrooms. Through constant exchange with architects, planners and installers, the range grew steadily to meet the many requirements.

DESIGN PLUS

Type of fixing

For screwing

Mounting sets are included.

Greater flexibility is not possible

Thanks to innovative hinge technology, the PLAN cosmetics mirror is perfectly adapted to the wishes of the viewer. The double-sided mirror – featuring a standard reflection and five times magnification – along with its sleek, elegant design, leaves nothing to be desired.

Complimentary

With PLAN BLUE, a consistent bathroom design is no art. The design is so versatile that it impresses equally in private residences and in the commercial sector.

More information
at keuco.com

Use PLAN to implement all plans. As flexible solutions are required in accessible bathrooms, the shower curtain rods from the PLAN series really cover all eventualities in corners, niches and under sloping roofs. The PLAN shower curtains are very practical – available in various colours and of course antibacterial, fungicide, showerproof and antistatic.

Features

Flame retardant

The shower curtain is made of flame retardant material.

Washable at 60°C

The PLAN 60° shower curtain can be washed at 60°C.

Antibacterial/fungicidal/antistatic

The shower curtain is made of antistatic material and has an antibacterial and fungicidal effect.

Surfaces

Chrome-plated
01

Aluminium silver-anodized
17

Shower curtain colours

White

Light Grey

Wool white

Truffle

Ecru

Anthracite

Assembly Recommendations

To prevent the curtain from resting on the bathtub floor or the floor itself, we recommend: Distance from shower curtain to floor approx. 30 mm. Distance between centre of bar and upper edge of shower curtain approx. 40 mm. The curtain width should be approx. 1.3 to 1.5 times the length of the curtain rod.

Customised shower curtains

On request, the shower curtain is available as a custom-made version in PLAN uni or PLAN Flame CS. The high-quality material is made of 100% Trevira with a density of 80 g/m² and is washable at 30°C. The fabric is tested for harmful substances in accordance with Öko-Tex Standard 100 and is antibacterial, antistatic, fungicide and calendered, which gives it a smooth surface and extra durability.

Shower curtain PLAN uni

- 100% Trevira
- Density: 80 g/m²
- Washing temperature 30 °C
- Tested for harmful substances in accordance with Öko-Tex Standard 100
- Antibacterial
- Anti-static
- Fungicide
- Calendered
- Distance between eyelets approx. 20 cm
- Reinforcement tape for stainless steel eyelets
- Stainless steel rolled hem, sewn on the right side, per meter 50 g
- Includes curtain rings

All dimensions refer to actual finished size.
 In order for the shower curtain not to touch bottom of bath tub or the floor we recommend the following:
 Distance between floor and bottom edge of curtain appr. 30 mm.
 Distance between centre of curtain pole and top edge of curtain appr. 40 mm.
 Please allow appr. 1.3 to 1.5 times curtain pole length when calculating required width of curtain.

More information
at [keuco.com](https://www.keuco.com)

Function integrates aesthetics. PLAN INTEGRAL, the system of wall-mounted modules for washbasins and toilets, impresses with its robustness, easy cleaning and easy refilling in an elegant, discreet design. The series is particularly suitable for public areas, as it can withstand heavy use.

Features

Wall-mounted installation
The product is installed concealed.

Aluminium
Front/doors made of solid aluminium.

Surfaces

Aluminium-finish
17

Black matt
37

White matt
51

Ideal for public areas

The PLAN INTEGRAL modules for the washbasin have a lockable front door for filling. This makes them ideal for use in commercial buildings and offers effective protection against vandalism.

Hygienic, convenient and sustainable:

Non-contact IXMO sensor fittings offer the highest level of hygiene and protection. They are also convenient, easy to clean and economically attractive as a smart solution. With their precise metering, they save water and costs. This makes them attractive in terms of sustainability and protection of resources.

Stylish addition. AVENO accessories are designed according to the principle “form follows function”. The reduction to a few geometric elements fosters a subtle sense of calm. The products can be both screwed and glued in place. Installation using the powerful adhesive is simple, fast and straight-forward.

Design that sticks

The wall elements of the AVENO accessories taper conically from the wall to the function and are designed for direct attachment. This gives the adhesive products a modern and understated wall connection without unnecessary protrusions and additional elements or rosettes.

Matching combination

The IXMO fittings from KEUCO perfectly complement the AVENO Accessories and create a harmonious, modern bathroom ambience. Its clean, sleek design seamlessly blends with the accessories and adds stylish accents, while high-quality craftsmanship ensures long-lasting functionality.

Variants available

The MOLL soap dispenser impresses with its versatility and high-quality workmanship. Depending on the design, it is available with an elegant glass slip-on cup or with a robust plastic variant. This allows for flexible integration into various bathroom concepts – ranging from elegant and sophisticated to practical and low-maintenance.

Unbeatable team

To harmoniously round off the bathroom design down to the last detail, KEUCO offers the right fittings for the various accessory design lines. This creates a consistent design concept: MOLL combines functionality and aesthetics with IXMO FLAT to create a harmonious overall look.

Secure hold in the bathroom

The CITY.2 series grab bar impresses with its high load capacity and tested safety. With a load capacity of up to 115 kg and TÜV-tested quality, it offers maximum safety and stability in the bathroom.

Flexible and convenient

The two-arm towel holder from the CITY.2 series is adjustable and stands out due to its versatile use. It provides convenient storage for towels while ensuring optimal air circulation during drying. Thanks to its clear lines and timeless design, it blends harmoniously into any bathroom design.

Design by
STUDIO F·A·PORSCHE

More information
at keuco.com

Design meets function. The KEUCO AXESS series combines the highest standards of comfort and safety in the bathroom. The hand shower slide rails, angled grab bars and grab bars with integrated hand shower slide rail have been developed in collaboration with the renowned design agency Studio F. A. Porsche.

Features

For screwing

The product is designed for screw mounting.

Load capacity up to 115 kg

The product can be loaded with up to 115 kg.

TÜV approved

The product has been tested and complies with TÜV specifications.

Surfaces

Chrome-plated
01

Aluminium silver-anodized
17

Black matt

Elegant on the wall:

Who says good design has to stop at drop down supporting rails? The visually appealing drop down supporting rail stands uniquely flat against the wall when folded up. When folded up, the profiles slide apart. This gives the wall a uniquely flat, elegant and almost sculptural look. It doesn't look so stylish as the familiar drop down supporting rail.

Security with beauty and comfort

The stool is easy to reposition using one hand and at the same time is particularly stable and resilient. The discreetly outward-facing legs with anti-slip feet give the bathroom stool a firm and secure stand. The softly roughened, non-slip surface of the seat has a pleasant feel and is easy to clean. The small hole in the middle of the seat, which is slightly curved inwards, allows water to drain off directly in the shower.

More information
at keuco.com

Because you need to feel safe. PLAN CARE is KEUCO's range of bathrooms, which with its functional and aesthetic diversity ensures the design of accessible bathrooms. The range offers products that aim to be equally usable and aesthetically pleasing for everyone, regardless of their physical constitution.

Features

For screwing

The product is designed for screw mounting.

Load capacity up to 115 kg

The product can be loaded with up to 115 kg.

TÜV approved

The product has been tested and complies with TÜV specifications.

Surfaces

Chrome-plated
01

Aluminium silver-anodized
17

Extremely insensitive

High-quality aluminum surfaces are particularly resistant to fingerprints and water drops, for example, and are therefore very easy to clean. These special properties are highly advantageous both in private bathrooms and when inserted in public and semi-public areas, such as hotels, clinics, or offices. Aluminum is also a popular material in interior design.

Contactless convenience

The IXMO sensor mixer tap is an ideal solution for accessible washbasins, as it offers the highest level of comfort and hygiene thanks to its contactless operation. Users can easily activate the water flow by simply approaching it – without any effort or complicated hand movements. This makes the fitting particularly suitable for people with limited mobility.

Please order separately.

Art.-No.	£
349 90 00 02 00	6.60

Mounting set 5

- 2 x Countersunk wood screw with TX 40,
10x80 stainless steel

Essential for mounting the following items:
article no. 349 02, 349 03, 349 79, 349 82,
350 03, 351 79.
Please order separately

Art.-No.	£
349 91 00 02 00	12.90

Mounting set 6

- 2 x Hexagon head wood screw
DIN 571 M10x100 stainless steel

Essential for mounting the following items:
article no. 149 80, 149 83, 349 83.
Please order separately.

Art.-No.	£
349 92 00 02 00	6.60

Fixing sets

Suitable for the following anchor bases / masonry:

Lightweight walls with integrated pre-wall installation and integrated steel plates, for example, support stands from pre-wall installation manufacturers.

Mounting set 7

- 3 x Cylinder screw with hexagon socket DIN 6912 M6x60 stainless steel

Essential for mounting the following items:
 article no. 349 01, 349 06, 349 07, 349 08, 349 11, 349 12, 349 14, 349 15, 350 01, 350 06, 350 11, 350 08, 350 14, 350 12, 350 15.
 Please order separately.

Art.-No.	£
349 93 00 02 00	7.60

Mounting set 8

- 2 x Countersunk screw with hexagon socket DIN 7991 M10x60 stainless steel

Essential for mounting the following items:
 article no. 349 02, 349 03, 349 79, 349 82, 350 03, 351 79.
 Please order separately

Art.-No.	£
349 94 00 02 00	7.40

Mounting set 9

- 2 x Hexagon head bolt DIN EN 24017 M10x60 stainless steel

Essential for mounting the following items:
 article no. 149 80, 149 83, 349 83.
 Please order separately.

Art.-No.	£
349 95 00 02 00	6.50

Architectural adaptability. Flexible dimensions, inexhaustible variety and straightforward design: The ROYAL MODULAR 2.0 mirror cabinet adapts to all requirements.

Features

LEDs
Particularly efficient LED lamps.

Adjustable light colour
Stepless from homely warm white to daylight white (2700 to 6500 Kelvin).

Dimmable
Infinitely variable light intensity.

Touch sensor
Intuitive sensor control is seamlessly integrated into the frame.

Light scenes
Different light sources offer all options for every time of day and mood.

Aluminium
Body/frame made of particularly stable anodised aluminium.

Exposed and concealed
The mirror cabinet is available as a wall-mounted, front-mounted or built-in version.

Custom made with black handles

All ROYAL MODULAR 2.0 mirror cabinets are also available with black handles as **custom-made items**.

Can be ordered under **article number 800 99 00 00 000000**.

The item number for the standard item must also be specified when ordering. The black handles are subject to a **surcharge of £ 48.60** over the standard item.

Accessories for more comfort

The optional cosmetics mirror is very practical and can be flexibly attached to the glass shelves and doors or set up as required.

Further optional accessories can be found at the end of the chapter.

Mirror cabinet variants

- 2 lighting variants (unlit/illuminated)
- 2 mounting types (exposed/concealed)
- 19 different widths in 100 mm increments (500 - 2100 mm), as well as 1050 and 1750 mm
- 2 heights (700/900 mm)
- 2 depths (120/160 mm)
- Optionally, **sockets** and **dual USB charging points** can be selected.

Ordering notes

- The basic article can be optionally supplemented with various equipment items.
- The complete article number results from the article number of the basic article, in addition to the desired equipment.
- Depending on the selected equipment, the article number is expanded by the corresponding digit (highlighted in bold) and the corresponding surcharge from the price column (right) is added.
- This results in the combined 15-digit article number and the total price, which is the sum of the surcharges.

Order example:

1-door mirror cabinet, unlit, door hinged left, wall-mounted version, 600 x 700 x 120 mm with one socket.

More information
at keuco.com

More light is not possible. An all-round LED light frame makes the ROYAL LUMOS mirror cabinet a real highlight in the bathroom, which effectively displays your favourite products with its illuminated shelf.

Features

LEDs

Particularly efficient LED lamps.

Adjustable light colour

Stepless from homely warm white to daylight white (2700 to 6500 Kelvin).

Dimmable

Infinitely variable light intensity.

Touch sensor

Intuitive sensor control is seamlessly integrated into the frame.

Light scenes

Different light sources offer all options for every time of day and mood.

Aluminium

Body/frame made of particularly stable anodised aluminium.

Exposed and concealed

The mirror cabinet is available as a wall-mounted, front-mounted or built-in version.

Mirror heating

Optionally equipped with mirror heating – for a clear view after showering.

Design decision

To add to the most attractive design and the open storage compartment, the ROYAL LUMOS mirror cabinet is also available as a model with a particularly large mirror surface, hiding the compartment behind it. You can choose between convenient access or a calm, tidy appearance.

More information
at keuco.com

Individual look for purists. Simple, beautiful and with many practical features - that's what sets SOMARIS apart. The mirror cabinet effectively caters to various needs, making it a versatile addition to the washbasin.

Features

LEDs
Particularly efficient LED lamps.

Dimmable
Infinitely variable light intensity.

Touch sensor
Intuitive sensor control is seamlessly integrated into the frame.

Aluminium
Body/frame made of particularly stable anodised aluminium.

Exposed and concealed
The mirror cabinet is available as a wall-mounted, front-mounted or built-in version.

Mirror heating
Optionally equipped with mirror heating – for a clear view after showering.

Surfaces

Mirror cabinet exposed 2-doors

- Protection code: IP 44
- Hinged doors off double sided crystal mirror with soft close hinge
- Body: aluminium silver-anodized
- Body side: in surface
- Interior rear panel: HDF

Operation

- Control panel with capacitive touch sensor

Functionalities

- Switches on / off
- Continuously dimmable
- Integrated extension function (room switch)

Illumination

- 3000 kelvin (warm white)
- Vertically
- Interior illumination
- LED 27 Watt

Equipment

- 1 socket
- 3 height-adjustable glass shelves

Mirror heating

- Positioned in the centre of the mirror
- Visual indication of the heating phase
- Automatic switch-off after 20 minutes
- 60 W

More information
at keuco.com

Lighting and storage solutions at their finest. The intelligent lighting concept, individually organisable storage space and attractive design make the ROYAL MATCH a universal mirror cabinet for every bathroom.

Features

LEDs

Particularly efficient LED lamps.

Dimmable

Infinitely variable light intensity.

Touch sensor

Intuitive sensor control is seamlessly integrated into the frame.

Aluminium

Body/frame made of particularly stable anodised aluminium.

Exposed and concealed

The mirror cabinet is available as a wall-mounted, front-mounted or built-in version.

The perfect pair

If a closer look is required, the iLook_move cosmetics mirror is the ideal choice. In addition to the aluminium finish, which harmoniously matches the mirror cabinet, it is available in many different surface variants, in round or square form.

Sustainable spare parts management

The mirror cabinet's LED strips offer a major advantage: They can be replaced by a qualified technician even after years. This means that KEUCO also provides the spare parts service that customers appreciate for LED technology - guaranteed for 10 years.

Limitless bathroom design. The EDITION 11 ART makes it possible to artfully design bathrooms with a very individual character. And the possibilities for realisation here are extremely diverse.

Features

Door opening

It is conveniently opened using a handle.

Soft-closing mechanism

The door closes particularly smoothly.

LED optional

The product is equipped with particularly efficient LED light sources.

Steel enamel

The washbasin is made of durable steel enamel.

Coordinated handle

The well-thought-out colour concept of the EDITION 11 ART extends down to the smallest detail. The side handle on the furniture is available in the same finishes as various KEUCO Fittings and Accessories and must be ordered separately for each fitting.

Flexible storage boxes

The illuminated interior in elegant carbon black creates an impressive harmony. The colour-coordinated optional storage boxes fit seamlessly. The boxes placed transversely structure the lower area of the drawer. Arranged lengthwise, they open up additional storage space on a second level.

Custom-made RAL Classic

For design lovers who want to make their bathroom even more individual, KEUCO offers custom-made products with the EDITION 11 ART.

The **bathroom furniture in price groups 1 - 3** (only the combinations lacquer/lacquer, lacquer/glass and glass/glass) are also available in **RAL Classic colours** (body & front in the same colour).

More information
at [keuco.com](https://www.keuco.com)

They're something special. Bathroom furniture of understated elegance that conceals a unique generosity: The seemingly floating fronts of the EDITION 11 lend the vanity units a special elegance.

Features

Push-to-open technology

Open by pressing on the drawer.

Soft-closing mechanism

The door closes particularly smoothly.

LED optional

The product is equipped with particularly efficient LED light sources.

Ceramic

The washbasin is made of ceramic.

VARICOR®

The washbasin is made of VARICOR® material.

Customisable design

The EDITION 11 Planning offers maximum flexibility and individuality. Thanks to bespoke solutions, washbasins with widths of up to 2800 mm can be achieved – perfectly tailored to individual preferences and spatial requirements.

Elegant on the outside, clever on the inside

As restrained as the EDITION 11 bathroom furniture is when closed, the possibilities that are hidden behind the facade are all the more surprising. If you open the front drawer, its interior lighting switches on automatically as an option. Freely positionable storage boxes, among other things, help to keep things tidy.

Ordering notes

Up to a total width of 2100 mm, **asymmetric sink base cabinets** (31153/31154/31163/31164) can also **be combined directly with side units**.

Several individual modules (sink base cabinet + side unit) make your **complete furniture from one piece!**
 Advantage: Seamless storage area next to the washbasin, faster assembly and better adjustment of the furniture components.

For variants with two pull-out fronts positioned one below the other, the corresponding base units (31310 - 31313) must also be ordered.

Order: Individual modules

Delivery: Complete piece of furniture made from a single piece

Please let us know which modules you would like to combine and enclose a sketch with your order.

Planning

Washbasin base units and base cabinets can be built **directly next** to each other.

The rows of furniture are complemented by the seamless Varicor washbasin is displayed.

A washbasin base cabinet is mandatory at the positions of the washbasin sinks required, as this includes a syphon cutout in the front pull-out and no additional upper floor.

Example:

Varicor double sink with a width of 2100 mm, combined with 2 x sink base cabinet 700 mm and 1 x base unit 700 mm.

Style across the board. The architectural approach of the X-LINE bathroom equipment series is recognisable in every detail. The bathroom furniture and washbasins are discreetly straight-lined.

Features

Door opening

The door is opened by lateral intervention.

Soft-closing mechanism

The door closes particularly smoothly.

Ceramic

The washbasin is made of ceramic.

Three versions available

Intelligent functionality is added to the design of the X-LINE bathroom furniture in detail. The washbasin base cabinet is available with one front pull-out unit, one front pull-out unit and one internal drawer unit or two front pull-out units.

Clear and practical

The well-thought-out drawer dividers in the X-LINE bathroom furniture ensure that care products are always within easy reach. The compartments can be arranged so that everything has a fixed place and nothing gets messy. This makes it particularly practical to use and optionally ensures a neat and organised bathroom layout.

Space-saving wonder for the guest bathroom

The straight-lined bathroom furniture and washbasins in a small format are an unmistakable statement of hospitality.

More information
at [keuco.com](https://www.keuco.com)

Stage free for your favourite things. With the furniture collection STAGELINE brings a homely atmosphere to the bathroom. The visual highlight of the series is an open, illuminated storage shelf, perfect for showcasing decorative items and favourites.

Features

Door opening

The door is opened by means of an upper catch.

Soft-closing mechanism

The door closes particularly smoothly.

LED

The product is equipped with particularly efficient LED light sources.

Ceramic

The washbasin is made of ceramic.

Socket

The product is equipped with a power socket.

USB-A/USB-C charging point

The product has a combined USB-A and USB-C charging point.

Recessed or surface-mounted

The sink base cabinets can be combined with white, flush-mounted ceramic sinks or round ceramic top sinks in glossy white or black - to suit your taste and personal style.

Guest bathroom with view

STAGELINE can also be used to create a homely atmosphere at the guest toilet. In the smallest version for the guest toilet, the washbasin base cabinet has a door - optionally with left or right hinge.

Clever organisation

The pull-out with optional drawer division ensures optimal use of space. The drawer divider can be assembled from different sizes for cleverly organised storage space. The dark and elegant drawer mat creates a slip-resistant surface. So everything stays in place.

← Empfang /
Reception

**§ 1
Scope**

(1) The following "General Terms and Conditions" apply to our business relationships with our customers, especially for the supply of products and the contracts, services, information and consultancy connected with these products. If separate individual agreements are concluded that vary from our terms of sale, the remaining terms of sales will be otherwise unaffected.

(2) Once our General Terms and Conditions are introduced into the business relationship with the Customer, these shall apply to all future business relationships between the Customer and us, insofar as nothing to the contrary has been agreed. The customer's terms and conditions will only apply if and insofar as we explicitly acknowledge them in writing. Our silence in relation to such alternative terms and conditions will, in particular, not be deemed to constitute acknowledgment or agreement, including in relation to future contracts.

(3) Our General Terms and Conditions will apply instead of any terms and conditions the Customer may have - such terms and conditions of purchase - even if the unreserved acknowledgment of the terms and conditions is provided for following the acceptance of the order. By accepting our order confirmation the Customer explicitly acknowledges that it waives any legal objection derived from its terms and conditions.

(4) These General Terms and Conditions apply only vis-à-vis "entrepreneurs" (commercial entities) within the definition of Section 14 of the German Civil Code (BGB), i. e. natural or legal persons purchasing goods or services for a commercial or occupational purpose.

**§ 2
Information, advice, product characteristics**

(1) The information, advice and other services we supply are based solely on our past experience. The details we provide about our products are based on our development activities and our application technology experience.

(2) The values stated in this context should be regarded as average values. All information concerning our products and services should be regarded as approximate values; this applies especially to the images, drawings, content and performance details and other such information contained our quotations and print materials. We relay these results - in writing and orally - to the best of our knowledge. We do not assume any liability in respect of them, over and beyond the relevant individual contract.

(3) Our product descriptions and information do not constitute a guarantee concerning quality or durability within the definition of Section 434 BGB, unless we have explicitly confirmed to the Customer in writing in advance, or a characteristic is defined in a written purchase agreement with the Customer. However, this does not release the Customer from its obligation, prior to purchase, to personally examine our products and processes for their suitability for the intended purpose.

(4) Any reference to standards, similar technical regulations and technical data, descriptions and images of the product or service set out in our quotations and catalogues and our advertising will only constitute the specification of a characteristic if we have expressly declared this quality to be a "characteristic"; otherwise such information is a non-binding, general performance description.

(5) We can only be deemed to have assumed a guarantee if we have described the characteristic or performance aspect in writing as "guaranteed".

(6) Other than the strict liability prescribed by law, we do not assume any liability for the suitability and/or registrability and/or marketability of our products or services for the purpose intended by the Customer, unless we have made a contrary agreement in writing with the Customer. The provision contained in Section 11 is not hereby affected.

(7) We reserve the rights of ownership and copyright to images, drawings, estimates of costs and other such documentation concerning our products and services. The customer undertakes not to provide the documents described in the preceding paragraph to any other party, unless we issue our express written permission.

**§ 3
Samples/models**

(1) Prior to the manufacture of the entire product, we will only provide the Customer with a sample/model of the goods ordered if this has been separately agreed. The characteristics of samples or models will only be an element of the contract if this has been expressly agreed in writing. The customer is not entitled to commercially exploit or pass on samples or models.

(2) Where orders are placed in accordance with the Customer's specifications (drawings/samples etc.), the Customer will release us from any third-party claims relating to industrial property right infringements in this connection.

**§ 4
Conclusion of contract, service scope,
performance risk, procurement risk**

(1) Our communications labelled "quotation" are made without obligation. These are invitations to place purchase orders and to enter into contracts. A contract will only be concluded - including within a continuous business relationship - once we have confirmed the Customer's purchase order or contract in writing or text form. The content of the contract is defined by our order confirmation. In the case of immediate delivery of the product or service, our confirmation may be substituted by our invoice or delivery note.

(2) We will only assume a procurement risk by way of an express agreement

by using the phrase "we assume the procurement risk for . . .". The assumption of a procurement risk is not established merely through our obligation to deliver an item defined only by its type. We are only obliged to make deliveries from our stocks, unless otherwise expressly agreed in writing.

(3) In the case of make-and-hold orders or delays in acceptance for which the Customer is responsible, we will be entitled to immediately procure the material required for the entire order and to immediately manufacture the entire deliverables and, in the case of customer delays, to offer these items and execute the order. As a result, any change requests by the Customer can no longer be considered after the order is placed unless this has been explicitly agreed upon in writing.

(4) The Customer must inform us in writing in good time prior to the conclusion of the agreement as to any special requirements it has in relation to our services or products.

(5) In the case of deliveries of products, we are entitled to make excess or short deliveries of units or weights if this is within 5% of the amount specified in the order or the amount indicated in the order confirmation.

(6) If formal acceptance of the service, or the receipt of a service or a product or the dispatch is delayed for a reason attributable to the Customer, if the Customer does not issue a dispatch order by the end of the agreed delivery period or if the Customer is culpable failing to fulfil its call obligations within the agreed time period or, in the absence of an agreed time period, within 4 months, irrespective of alternative or farther-reaching rights and having granted a 10-day grace period which has subsequently expired, we will be entitled to choose to demand immediate payment or to rescind the agreement or to refuse performance and demand compensation in lieu of complete performance. This grace period must be granted in writing or text form. We are not obliged to again refer to the rights set out in this paragraph. In the event of a demand for damages, the payable damages are 20% of the net delivery price. The customer remains entitled to prove another amount of damages was incurred or that no damages were incurred.

(7) If the dispatch or collection of the products is postponed at the request of the Customer or for reasons attributable to the Customer, commencing with the point in time at which the products should have been dispatched or collected by the Customer we will be entitled to store them at the sole risk of the Customer and charge the Customer for the costs incurred at a flat-rate of 2.5% of the net invoice amount for each month commenced in the delay. The customer remains entitled to prove that different storage costs or no storage costs were incurred. Furthermore, we are entitled to otherwise use the contractual products after expiry of this period and we may re-deliver to the Customer after a reasonable period of time.

(8) In the event of a delayed delivery order or call for which the Customer is at fault, we will be entitled to postpone the delivery or service for a period of time equivalent to the Customer delay.

**§ 5
Performance, performance period, delay**

(1) Binding delivery or performance dates and delivery or performance periods must be explicitly agreed with us in writing in order to be enforceable. In the absence of any such separate agreement, or if it is agreed that these delivery or performance dates and delivery or performance periods are approximate etc., these dates/periods are non-binding. In this case we will employ our best efforts to meet these.

(2) The delivery or performance periods commence with the receipt of our order confirmation by the Customer, but not however before all details concerning the execution of the order have been clarified and all other prerequisites have been met by the Customer, especially not before all advance payments have been agreed. This applies likewise to delivery and performance dates. If the Customer has made change requests following the order placement, a new delivery period commences with our confirmation of the change.

(3) Product deliveries prior to the expiry of the delivery period are permissible, as are part deliveries provided this is reasonable to expect of the Customer.

(4) The delivery date confirmed in writing is deemed to be the date of delivery. If two or more individual contracts concerning identical products being processed in parallel, we will then be entitled to determine the sequence in which the individual contracts are fulfilled. If no contrary written agreement has been concluded, the interest in receiving our service is only extinguished if we fail to deliver material part or if we only deliver after a delay.

(5) In the case of product deliveries and a duty to collect, the relevant date is the day on which notice is given regarding the readiness for shipment, otherwise it is the day on which the product is dispatched.

(6) Deliveries shall be made - unless otherwise agreed - at our option in the case of long-term contracts at the time of the call, and in the case of single contracts, within the agreed delivery period. We may proffer the product or the goods by the 1st working day following the conclusion of contract and at any time during normal business hours within the delivery and performance period.

(7) If the Customer wishes a delivery or performance time on a particular day or in a calendar week, this can be recorded in our order confirmation to the Customer. This does not establish a binding obligation on our part to ensure this delivery or performance time is actually fulfilled. However, we will use our best efforts to meet the delivery or performance time. We will notify the Customer in good time of any delays.

(8) If we default in making the delivery, the Customer must first grant us a reasonable additional time period in which to effect performance. If this elapses without success, claims to damages for breaches of duty - irrespective of the reason - will only exist in accordance with

the provisions of Section 11 (Disclaimer and liability of limitation) .

(9) In cases of delayed delivery the Customer is duty bound, upon our demand, to declare within a reasonable period if it intends to rescind the contract due to the delay to delivery or whether it will insist on delivery taking place.

(10) We will not be in default as long as the Customer is in default in fulfilling its obligations to us, including obligations under other contracts.

(11) If the Customer fails to accept products or services despite a legal obligation to do so, we will be entitled to ascertain the damages. In the case of product deliveries this takes the form of re-sale on default to other parties or the determination of a price by an appraiser. If an announced re-sale on default is not realised or cannot be realised in an appropriate manner or time period, the right to claim damages will endure. The ascertainment of damages will take the form of the price determined by an appraiser. In any case the key date for determining the price is the first working day following the expiry of the additional period of time.

(12) We may at any time deliver a third-party product equivalent in function and value to our products, if we are unable to deliver our own product for technical reasons or a failure to receive supplies from our own suppliers despite having implemented reasonable stock coverage measures, and we credit the Customer with any difference in price, unless the delivery of our own products is explicitly agreed in writing. Section 305b BGB (Priority of individually agreed terms) remains unaffected.

(13) We reserve the right to make changes within customary limits to our products, series and models. We are likewise entitled to deliver the product/series/model corresponding or similar to function, value and design set out in the purchase order, if we find it impossible to deliver the agreed product due to technical or legal reasons for which we are not responsible, or in the event of a failure to receive supplies from our own suppliers (cf. Section 6 below) and we credit the Customer with any price difference.

(14) We may likewise at any time fulfil our contractual performance obligations using the services of sub-contractors, provided no strictly personal service is agreed.

§ 6

Delivery subject to receiving deliveries from our own sub-suppliers; force majeure and other impediments

(1) If we do not receive a delivery or service from our sub-suppliers to allow us to make the delivery or render the service contractually required from us, despite due and adequate stocking in relation to quantity and quality under our delivery or service agreement with the Customer (matching coverage), for reasons for which we are not responsible, or it is incorrect or not within the due time, or if force majeure occurs for a significant period (i.e. more than 14 calendar days), we will notify our customer in writing or text form in good time. In this case we shall be to postpone the delivery for the duration of the impediment or to wholly or partially rescind the agreement in view of the unfulfilled part, provided we have fulfilled our aforementioned duty of notification and have not assumed the risk for procurement. Force majeure occurs in the event of a strike, lock-out, interventions by the authorities, energy or raw material shortages, transport constrictions or impediments and operational impediments for which we are not at fault, e.g. where these are caused by fire, water and machine damage, or any other impediments that, from an objective perspective, we are not culpable for causing.

(2) The customer will be entitled to cancel that part of the agreement not yet fulfilled if a delivery or service date or delivery or service period has been bindingly agreed, or if the agreed delivery or service date or delivery or service period is exceeded by more than four weeks as a result of any events set out in Section 6 (1) above, or, in the case where the delivery date is not binding, it would be unreasonable to hold the Customer to the agreement. In such a case the Customer has no other rights, especially no rights to compensation.

§ 7

Shipment, packaging and transfer of risk

(1) Unless otherwise agreed in writing, products will be shipped ex works by us, uninsured and at the risk and cost of the Customer. We reserve the right to choose the route and means of transport. We shall, however, endeavour to take the Customer's wishes into account with respect to the route and type of shipment. Any resulting additional expenses - including where carriage paid shipment is agreed - shall be borne by the Customer.

(2) If the consignment is delayed at the request or fault of the Customer, we will store the goods at the Customer's cost and risk. In this case the notification of readiness for shipment is deemed to be equivalent to the actual consignment.

(3) The risk of accidental loss or accidental deterioration shall pass to the Customer when the products and goods to be delivered are handed over to the Customer or, if consignment has been agreed, to the forwarder, freight carrier or other firms charged with shipping the products but no later than the time the products leave our works, warehouse or branch site.

(4) If delivery is delayed because we assert our right of retention due to the Customer's complete or partial default in making payment, for another reason for which the Customer is responsible, the risk shall pass to the Customer no later than the date of the notice to the Customer announcing that the delivery is ready for shipment.

(5) If the products are to be collected by the Customer or another determined by it, the collection dates or time periods must be coordinated with us no later than 3 days prior to the delivery date.

(6) In the absence of any special agreement, the mode of shipment and

packaging will be determined at our discretion in accordance with Section 315 BGB.

§ 8

Duty to report defects, breach of duty, material defects

(1) The customer must give us notice of evident material defects immediately but no later than 12 days following collection in the case of delivery ex works, otherwise following the delivery. Notice of hidden material defects must be provided to us immediately following discovery but no later than before the end of the warranty period pursuant to Paragraph 8.10. A notice of defects made out of time will preclude any claim by the Customer for breach of duty due to material defects. This does not apply in the case of deliberate, grossly negligent or fraudulent acts on our part, in the event of death or personal injury or the assumption of a guarantee of the absence of defects, or a procurement risk pursuant to Section 276 BGB or in the case of other such strict legal liability and in the event a right of recourse within the supply chain (§§ 478, 479 BGB).

(2) The defect notification must be communicated in writing. A formally inadequate notice of defects will preclude any claim by the Customer due to material defects. A defect notification will be ineffective if it does not contain the exact article number and the information particulars of the item concerned.

(3) If products are delivered by consignment, evident defects at the time of delivery must be reported to the shipping company, which should be requested to record said defects. Notifications of defects must contain the best possible description of the defect. If defects in number and weight were already discernible at the time of delivery in accordance with the aforementioned examination duties, the Customer must issue a complaint about the defects to the shipping company upon receiving the products, and it should have this complaint certified. A notice of defects not made in this way will, to this extent, preclude any claim by the Customer for breach of duty due to defects. This does not apply in the case of deliberate or grossly negligent acts on our part, in the event of death or personal injury or the assumption of a guarantee of the absence of defects, or a procurement risk pursuant to Section 276 BGB or in the case of other such strict legal liability and in the event a right of recourse within the supply chain (§ 478 BGB).

(4) The customer must give notice in writing immediately of any other breaches of duty, and, before asserting any further rights, it must grant a reasonable time limit for delivery of a remedy.

(5) The delivered products are deemed to have been accepted as contractually compliant by the Customer upon the commencement of any processing, modification, mixing or combination with other articles. The same applies in the event that the goods are relocated away from the original destination. Prior to the commencement of any of the aforementioned activities, the Customer is required to perform checks suitable in scope and methodology in order to clarify if the delivered products are suitable for the processing, processes and other purposes intended by the Customer.

(6) If the defect notice is issued without justification, we will be entitled to demand that the Customer compensate us for the costs we incur as a result.

(7) If the Customer is a "merchant", we will rectify any defects for which the Customer itself is responsible, and eliminate any unjustified complaints on behalf of and at the expense of the Customer.

(8) We are only obliged to render subsequent improvement and substitute delivery or replacement production in that country in which we sold our product to the Customer, or to which the goods were duly delivered or the service was rendered in accordance with the contract.

(9) The customer's claims in relation to costs necessarily incurred for the purpose of subsequent performance, especially shipment, travel, labour and material costs are excluded to the extent that these costs increase because the object of delivery is subsequently relocated to a place other than the agreed place of delivery, if such a relocation does not accord with the designated use. This does not apply to recourse claims pursuant to Sections 478, 479 BGB, as well as in the event of fraud or deliberate damage or the assumption of a warranty.

(10) Unless otherwise explicitly agreed in writing or other such text form, we assume a 12-month warranty in respect of material defects, said period starting from the date of the transfer of risk (cf. Para. 06.4); in the event of the Customer's refusal to accept or receive, said period commences from the time the delivery notification concerning the hand-over of goods is issued. This does not apply to claims for damages based on a guarantee, the assumption of a procurement risk within the definition of Section 276 BGB, due to death or personal injury or a fraudulent, intentional or grossly negligent or fraudulent acts, or if, in the cases of Section 478 BGB (recourse within the supply chain), Section 438 (1) No. 2 (buildings and items intended for buildings), and Section 634 a (1) No. 2 BGB (building defects), a longer period is stipulated by law. Section 305b BGB (Priority of individual terms agreed orally, in writing or in text form) remains unaffected. The aforementioned provision does not entail a reversal of the burden of proof.

(11) Further claims by the Customer for or in connection with defects or consequential damage caused by a defect, for whatever reason, shall exist only subject to the provisions of Para. 11 (Disclaimer and limitation of liability).

(12) Our warranty and ensuing liability will be excluded if defects and damages connected therewith cannot be conclusively attributed to our defective products or defective performance. The warranty and any liability under it is especially excluded for the consequences of the erroneous use or natural wearing of the products, as well as the consequences of physical, chemical or electrolytic influences that do not correspond to the anticipated average standard influences. It is likewise excluded in respect of unsuitable or improper use; defective assembly or start-up on the part of the Customer or by another party designated by it; natural wear and tear; incorrect or negligent handling; improper maintenance.

nance. The foregoing provision does not apply to fraudulent, gross negligent or intentional acts on our part, or death or personal injury, the assumption of a guarantee, a procurement risk pursuant to Section 276 BGB or in the case of strict legal liability given the prevailing circumstances.

(13) If the Customer or a third party improperly rectifies a defect, we will not be liable for the resulting consequences. This shall also apply to any modifications of the product undertaken without our prior consent or changes of use not approved by the manufacturer compared to the use specified by it. Any rights of recourse in favour of the Customer against us in the event of a resale of the goods exist only to the extent that the Customer has not made any agreements with its end customer over and beyond the provisions contained in the statutory claims for defects.

(14) Acknowledgement of breaches of duty - in particular in connection with the delivery of defective products - will only be valid if issued in writing.

§9 Prices, conditions of payment, default, grounds for uncertainty, taking back, right of retention

(1) As a rule all prices are quoted in £, and are subject to the additional costs of packaging, shipment ex works or warehouse, plus value-added-tax charged at the applicable legal rate and payable by the Customer.

(2) In the absence of an alternative agreement, services not contained in the quotation will be performed on the basis of our applicable general price lists, as may be amended from time to time. (3) We are entitled to unilaterally and appropriately increase the due payment in the event of an increase in material production and/or procurement costs and/or product procurement costs, wage and non-wage costs, social security contributions as well as energy costs and costs incurred due to environmental regulations, exchange rate fluctuations and/or currency regulations and/or changes to import/export duties and/or freight rates and/or public levies, if these directly or indirectly affect the merchandise production costs or the costs of our contractually agreed services and if there are more than 4 months between the conclusion of contract and the delivery. An increase as described above will be precluded if the increase in costs in relation to any aforementioned factors can be balanced by a reduction in the costs of other aforementioned factors with reference to the total cost charge for the delivery. If any of the aforementioned cost factors are reduced, and this reduction is not offset by an increasing in any of the other aforementioned factors, the reduction in costs will be passed onto the Customer in the form of a reduced price.

(4) If, in an exceptional case, we are to contractually bear the freight charges, the Customer will bear any additional costs connected with increases in freight rates arising after the conclusion of contract.

(5) Our invoices are payable without deduction within 30 days following delivery/performance. We are also entitled to demand payments be made concurrently with product deliveries, in the event there are objective grounds indicating that the Customer is unable or unwilling to service its debts, particularly if the customers is in default of the settlement of our payment demands. If an early payment discount has been agreed, this will be calculated on the basis of the net amount and is only permissible if all other liabilities pertaining to the business relationship with the Customer and older than 30 days have been settled. The purchaser's credit note will only be deemed to be an invoice if this has been expressly agreed. Unless otherwise agreed, in these cases the invoiced sums are payable without deduction within 30 days - the funds to be received by us in this time - following hand-over of the goods.

(6) Irrespective of the Customer's contrary terms, we will be entitled to offset payments against older debts first; we will notify the Customer of the nature of the offset performed. If costs and interest have already been accrued, we shall be entitled to use the payment to firstly satisfy costs, then the accrued interest and finally the principle debt. The absence of a reminder notwithstanding, the Customer will be in default if it fails to make payment within 31 days of the delivery/service or within 31 days of the delivery notification in the case of delivery ex works. If a binding payment date was agreed, the Customer will be in default if it fails to observe the payment date.

(7) Once the Customer is in default, default interest will be charged at the rate of 8% of the applicable base interest rate from the time that the default occurred. This rate will be reduced if the Customer demonstrates a low rate of loss; we reserve the right to demonstrate that the actual damages are higher.

(8) Furthermore, in the event of default of payment on the part of the Customer, we are entitled to withhold deliveries or services under all agreements with the Customer until the complete satisfaction of claims. The Customer can circumvent this right of retention by arranging a directly enforceable and unlimited surety from a major German bank or a municipal bank which is affiliated with the asset collateral fund; the surety will cover the amount of all payments due.

(9) Any default in the fulfilment of a receivable will also result in all our receivables under the business arrangement being due and payable immediately. The date of payment is deemed to be the day that we received the money or our account is credited. If conditions of payment go unfulfilled or circumstances become known or discernible that, according to our prudent commercial judgement, give rise to justified doubt about the Customer's creditworthiness, also including such facts that existed when the contract was concluded but which were unknown to us or did not have to be known to us, we shall be entitled, additional statutory rights in such cases notwithstanding, to cease any further work on current orders or delivery, and, using our reasonable discretion (§ 315 BGB), to request advance payments or the provision of appropriate customary securities for deliveries still outstanding, and, after expiry of a reasonable extension of time to provide such securities is unsuccessful, to rescind the contract, irrespective of other statutory rights. The customer shall be obliged to reimburse

us for all damages sustained due to non-performance of the contract.

(10) If payments are deferred and they are made later than originally agreed, interest shall be charged for the deferral period at the rate of 8% over the basic interest rate from the time the deferral petition is made, without the issue of a notice of default being necessary.

(11) The Customer has a right of retention or right of offset only in terms of those counter claims which are not disputed or which have been declared res judicata, unless the counter-claim is based on the breach of material contractual obligations. A right of retention can only be exercised by the Customer to the extent that its counter-claim is derived from the same contractual relationship. "Material contractual obligations" are those duties which protect the material contractual rights of the supplier and are specifically granted to it according to the content and purpose of the agreement, and those contractual obligations the fulfilment of which is a pre-requisite to the proper performance of the agreement and the fulfilment of which is a fact on which the supplier would normally and rightfully rely.

(12) Our price lists and other such price information are subject to change, unless we have explicitly indicated in writing that these are binding.

(13) In the event of an application to open insolvency proceedings by the Customer or its suspension of payments not connected with rights of retention or other such rights, we will be entitled to rescind the agreement at any time or to make delivery of the purchased goods conditional on advance settlement of the payment obligation, insofar as the Customer is in breach of its obligations at this time. If the delivery of the purchased goods has already taken place, the purchase price is immediately due in such cases described above. We are likewise entitled to demand return of the purchased goods in the aforementioned cases and to withhold these until complete payment of the purchase price is made.

(14) If the Customer suspends its payments or it files an insolvency application, the Customer will no longer be entitled to the sell, process, combine or blend of the goods subject to retention of title (cf. Section 10 Paragraph (1)). In this case, it must instead immediately ensure the separate storage and labelling of goods subject to retention of title and it shall keep in trust for us the sums received by the Customer and to which we are entitled under claims assigned in connection with our deliveries of goods.

§ 10 Retention of title

(1) We retain title to all equipment and goods we deliver (hereinafter referred to as a whole as "goods subject to retention of title") until all our claims under the business relationship with the Customer, including claims arising in the future from contracts concluded at a later date, are paid. This shall also apply to any balance in our favour when any or all claims by us are incorporated in a current account and the balance has been established.

(2) The customer must insure the goods subject to retention of title adequately, particularly against fire and theft. Claims against the insurance company arising from a damage event relating to goods subject to retention of title are herewith assigned to us in the value of the goods subject to retention of title.

(3) The customer is authorised to resell the delivered products in the normal course of its business. The customer is not permitted to make other disposals, especially pledging or granting of lien entitlements. If goods subject to retention of title are not paid for immediately by third-party buyers when resold, the Customer may only resell under retention of title. Authorisation to resell the goods subject to retention of title will cease automatically if the Customer suspends payment or defaults in payment to us. The same applies if the Customer is affiliated with a consolidated group and/or one of the aforementioned circumstances arises in relation to the parent or supraordinate company of the Customer.

(4) The customer here and now assigns to us all claims including securities and ancillary rights that accrue to it against the end user or third parties by reason of or in connection with the resale of goods subject to retention of title. The customer may not reach an agreement with its purchasers that in any way excludes or impairs our rights or nullifies the assignment of the claim from the outset. When the goods subject to retention of title are sold with other items, the claim against third-party buyers amounting to the delivery price agreed between ourselves and the Customer shall be deemed assigned unless the amounts applicable to the individual goods can be determined from the invoice.

(5) The customer shall be entitled to collect claims assigned to us until revoked by us, which we may do at any time. Upon our request, the Customer will be obliged to give us the information and documents in full required to collect assigned claims, and unless we do so ourselves, it must notify its buyers immediately of the assignment made to us.

(6) If the Customer incorporates claims from the resale of goods subject to retention of title in a current account arrangement with buyers, the Customer shall herewith assign to us any recognised closing balance in its favour in the amount which corresponds to the total amount of the claim from the resale of our goods subject to retention of title, such claim being transferred to the current account relationship.

(7) The customer must notify us immediately if the Customer has already assigned claims to third parties from the resale of products delivered or to be delivered by us, particularly by way of a non-recourse and recourse factoring, or made other agreements which can impair our current or future security interests under to this Paragraph 10. In the case of a recourse factoring, we shall be authorised to rescind the contract and request the products already delivered to be handed over. This shall also apply to a non-recourse factoring arrangement if, according to the contract with the factor, the Customer cannot freely dispose of the purchase price of the claim.

(8) If the Customer is in breach of contract, especially if it is in default of its payment obligations, we will be entitled to take back possession of all goods subject to retention of title. In this case the Customer will be obliged, without further ado, to surrender the goods subject to retention of title. At any time during normal business hours, we are permitted to enter the Customer's business premises to take an inventory of the goods delivered by us.

(9) In taking back possession of the goods subject to retention of title, we are not rescinding the contract unless we expressly state this in writing or it is stipulated by strict statutory provisions.

(10) The customer must inform us immediately in writing of any third-party interference with the goods subject to retention of title or any claim assigned to us.

(11) If the value of the existing collateral securities exceeds the secured claims by more than 10%, then, upon demand by the Customer, we shall be obliged to release collateral; the choice of what securities are to be released rests with us.

(12) The transformation and processing of goods subject to retention of title is performed on our behalf as the manufacturer within the definition of Section 950 BGB; this does not create any obligation on our part however. If the delivered goods are reprocessed with other items not belonging to us, we will acquire co-ownership in the new object equal to the proportion of the invoice value of the delivered goods compared to that of the other reprocessed or combined articles. If our goods are combined with other movable items into a single article deemed the principal article, the Customer shall here and now assign to us co-ownership therein to an equivalent proportion. The customer shall keep protect our sole or co-ownership rights at no charge to us. The co-ownership rights created in this way are deemed to be goods subject to retention of title. Upon our demand, the Customer shall be obliged at any time to provide us with the information we require to assert our ownership or co-ownership rights.

(13) If, in the case of deliveries exported abroad, certain measures must be performed by us or by the Customer in the importing country for the effectiveness of the aforementioned retention of title or the other rights described therein, the Customer must inform us of this fact in writing or in text form and it will promptly perform measures of this kind at its own cost. We will cooperate to the requisite extent in this. If the law of the importing country does not permit retention of title, but allows us to reserve other rights as to the goods supplied, we may exercise all such rights using our reasonable discretion (§ 315 BGB). Insofar as an equivalent guarantee for our claims on the Customer is not achieved in this way, the Customer is duty bound to provide us with other security in respect of the goods supplied or other collateral at its own cost, in which situation we may exercise our reasonable discretion (§ 315 BGB).

§ 11 Disclaimer and limitation of liability

(1) Subject to the following exceptions, we shall not be liable especially not for the Customer's claims for damage of the reimbursement of costs - irrespective of the legal basis - in the event of breaches of duty established by the contractual arrangement.

(2) The disclaimer set out in Paragraph 11.1 above does not apply in case of strict legal liability as well as:

- for our own intentional or grossly negligent breach of duty and the intentional or grossly negligent breach of duty on the part of our statutory representatives or vicarious agents;
- for the breach of material contractual obligations; "material contractual obligations" are those obligations which protect the legal position of the Customer, and which are to be specifically afforded to him in accordance with the content and purpose of the agreement. Furthermore, contractual duties are deemed fundamental where the fulfilment of these is imperative for the orderly performance of the contract and upon which the contractual partner would and may normally rely;
- in the event of death or personal injury, including that caused by statutory representatives or vicarious agents;
- in the case of default, where delivery and/or service by a fixed date was agreed;
- where we have assumed a warranty regarding the quality of our goods or the outcome of the service, or a procurement risk within the definition of Section 276 BGB;
- in the case of liability according to the Product Liability Act or other such strict statutory liability.

(3) In the event that we or our vicarious agents are culpable of slight negligence and none of the scenarios described under Para. 11.2, indents 3, 4, 5 and 6, we will only be liable for foreseeable damage typical for this type of contract, including in the case of the breach of material contractual obligations.

(4) The sum of our liability is limited to a maximum indemnity limit of EUR 250,000.00 for each individual damage event. This does not apply if we have acted fraudulently, intentionally or with gross negligence, for claims concerning death or personal injury as well as in the case of a claim in tort or one based on an expressly assumed guarantee or the assumption of a procurement risk in accordance with Section 276 BGB or in the event the strictly applicable legal provision prescribe a higher level of liability. Any other liability is excluded.

(5) The exclusions and limitations on liability as set out in Para. 11.1 to 11.4 and Para. 11.6 apply to the same extent in favour of our executive bodies, our managerial and non-managerial employees, other vicarious agents and our sub-contractors.

(6) The customer's claims to compensation established under this contractual arrangement can only be asserted within an exclusion period of one year from the legal commencement of the limitation period. This does not apply if we have acted intentionally or with gross negligence, for claims concerning

death or personal injury as well as in the case of a claim in tort or one based on an expressly assumed guarantee or the assumption of a procurement risk in accordance with Section 276 BGB or in the event that strictly applicable legal provisions prescribe a longer limitation period.

(7) The aforementioned provisions do not entail a reversal of the burden of proof.

12 Third-party property rights

(1) Unless otherwise agreed, we are obliged only to deliver goods in the Federal Republic of Germany that are not encumbered by third-party industrial property rights or copyright. If a third party asserts legitimate claims for the infringement of property rights through products delivered by us to the Customer, we shall be liable to the Customer as follows:

a. We shall firstly attempt to either procure a licence at our expense for the deliveries in question or modify the products in order that the property right is not infringed, or we will be substitute the product, the choice resting with us. If we are unable to do so at reasonable conditions, the Customer shall be entitled to its legal rights, which are defined, however, on the basis of these General Terms and Conditions.

b. Our aforementioned duties are only then established if the customer promptly informs us of the third-party claim made against it, it refrains from acknowledging the claim and enables us to attend to all measures necessary for defending the claim and negotiating a settlement. If the Customer ceases use of the products for the purpose of limiting damages or for any other material reasons, it is duly bound to inform the third party that this cessation of use may not be implied as any acknowledgement of the alleged property right violation. If an action is filed by third parties against the Customer for infringement of property rights resulting from the use of products delivered by us, the Customer undertakes to notify us immediately in writing and afford us the opportunity to become party to any legal proceedings. The customer must support us in every relevant way in conducting such a legal dispute. The customer must desist from everything that could prejudice our legal position.

(2) The customer has no claims in the event that it is responsible for the property rights infringement. Claims of the Customer are likewise excluded if property rights infringement is caused due to particular specifications demanded by the Customer, through a type of use not foreseen by us or which is caused by the fact that the products were modified by the Customer or used together with other products not delivered by us.

§ 13 Product liability

(1) The customer will not modify any safety-relevant aspects of the goods. In particular it will not modify or remove any warnings of the risks if the goods are used improperly. If it breaches this duty, the Customer will indemnify us - for the purpose of the internal relationship - in respect of third-party product liability claims, insofar as the Customer is responsible for the triggering circumstance.

(2) If a product defect in the goods requires us to undertake a product recall or issue a warning, the Customer will assist us and perform all measures ordered by us and reasonable to expect of him. The customer will be obliged to bear the costs of the product recall or the product warning, to the extent that, in accordance with product liability principles, he is responsible for the product defect and the resulting damage. All our other claims remain unaffected.

(3) The customer will promptly notify us of the risks of which it become aware in relation to the use of the goods and the possible product defects.

§ 14 Place of performance, legal venue; applicable law

(1) The place of performance for all contractual obligations is the registered address of our company.

(2) The exclusive legal venue for hearing all disputes is that court with jurisdiction over the place in which our company has its registered address, insofar as an alternative legal venue is not strictly prescribed by law. We are entitled, however, to pursue legal actions against the Customer at that court with general jurisdiction for its registered place of business.

(3) All legal relations between us and the Customer are exclusively subject to the law of the Federal Republic of Germany to the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG). The aforementioned provisions likewise apply if the Customer is a foreign national or has relocated his domicile abroad.

§ 15 INCOTERMS, Prohibition on assignment Amendments and additions, written form, severability clause

(1) Insofar as commercial clauses are agreed in accordance with the International Commercial Terms (INCOTERMS), the INCOTERMS 2010 shall apply.

(2) We hereby repudiate any prohibition or restriction on assignment as may be provided for in the Customer terms and conditions; this applies especially if the assignment is made dependent on the Customer's prior consent.

(3) Amendments to these terms and conditions will be disclosed in writing to the Customer in the case of a continuous business relationship. Such amendments are deemed approved by the Customer if it does not raise any written objections. We must point out this legal consequence when issuing the change notification. The customer must send us objection within six weeks of having

received the change notification .

(4) All agreements, additional agreements, covenants and contractual amendments must be made in writing . This applies equally to the setting aside of this requirement of the written form . Additional oral agreements or amendments/additions are null and void .

(5) If not based on its right of retention or other such rights , any cessation of payments on the part of the Customer will entitle us , having granted a reasonable additional period of time , at any time to rescind the contract or make the delivery of the products of service dependent on the prior fulfilment of payment obligations . If the delivery of the products has already taken place , the counter-performance is due immediately in such cases described above . We are likewise entitled to demand return of the products in the aforementioned cases and to withhold these until complete payment of the purchase price is made , unless advance performance is agreed . If the Customer ceases making payments or if it files an insolvency application , the Customer will no longer be entitled to the sell , process , combine or mix goods subject to retention of title . In this case , it must instead immediately ensure the separate storage and labelling of goods subject to retention of title and it shall keep in trust for us the sums received by the Customer and to which we are entitled under claims assigned in connection with our deliveries of goods .

(6) The customer may not assign its contractual rights without our written consent . Section 354a German Commercial Code (HGB) remains unaffected .

(7) If, in accordance with the law concerning standard business terms set out in Sections 305 to 310 German Civil Code (BGB) , any of the provisions of this contract are or become wholly or partially ineffective/void or unenforceable, the statutory regulations shall apply . If, for reasons other than the law concerning standard business terms set out in Sections 305 to 310 German Civil Code (BGB) , any of the current or future provisions of this contract are or become wholly or partially ineffective/void or unenforceable , this will not affect the validity of the remaining provisions of this contract , provided the performance of the contract - including given the following regulations - would not present an unreasonable hardship to one of the parties . The same applies in the event that an augmentable gap is discovered following the conclusion of the contract . The parties shall replace any invalid/void/unenforceable provision or gap that requires filling , for reasons other than the provisions relating to the Law of General Terms and Conditions according to Sections 305 to 310 BGB , with a valid provision the legal and commercial content of which corresponds to the invalid/void/unenforceable original provision and to the purpose of the contract as a whole . Section 139 BGB (Partial invalidity) is expressly excluded - including in relation to any provisions concerning the burden of proof . If the invalidity of any provision , as described above , is due to its specification of a measurement of performance or time (time limit or date) , the parties will agree to insert that provision containing the legally admissible measurement that most closely matches the original .

Note :

In accordance with the provisions of the Federal Data Protection Act , we clearly state that our undertaking is managed using an IT system , and that , in this connection , we will store the data received from the Customer by way of the business relationship .

February 2015

Materials

Fittings Accessories

KEUCO products impress with their uncompromising standard of workmanship, precise functionality and ease of installation.

Quality also encompasses the principle of sustainability. Maximum service life, minimised maintenance and timeless design. Handling water with care is part and parcel of our responsibility to the environment. This is why we offer water-saving mixer taps, for instance. The wide range of KEUCO fitting designs offers the ideal solution for any bathroom layout and any individual interior style.

Electroplated surfaces - Chrome and aluminium-finish

In electrolytic immersion baths, all visible parts are nickel-plated and chrome-plated. KEUCO chrome surfaces are characterised by a deep gloss. Fittings and accessories with an aluminium finish are treated using the same process and are also characterised by a high standard of quality and durability.

Electroplated surfaces - Brushed brass, brushed rose gold

The rose gold and brass surfaces are made with precious metals. Rose gold also undergoes a galvanic white bronze finish. Among other things, the galvanic electro-plating process increases corrosion resistance. The subsequent passivation gives it an additional protective layer.

PVD surfaces - Brushed bronze, stainless steel-finish, brushed black chrome

The bronze and black chrome surfaces are not electroplated, but instead produced with a so-called PVD coating (physical vapour deposition). In a vacuum-based process, a thin layer is applied to chrome-plated and brushed parts, which enables different colour tones to be created.

The manufacturing process guarantees an extremely resistant surface with a very high degree of hardness.

Painted surfaces - white matt, black matt

The black matt surface is created by a very high-quality powder coating. For this process, all fittings and accessories are cleaned and pre-treated in advance. The powder is then applied to the electrically conductive surface and stoved at temperatures of up to 250°C, resulting in an attractive, resistant and durable coating.

Aluminium

KEUCO aluminium accessories are either aluminium silver anodised or aluminium-finish. This makes them very resistant and protected against corrosion. The surface is extremely scratch-resistant and features a matt look.

Stainless steel

Some fittings and accessories are made of stainless steel. The surface is either brushed (matt look) or polished (chrome finish look). Stainless steel is a corrosion-resistant, durable and hygienic material. In terms of recyclability and service life, stainless steel is a very sustainable material.

Glass

Accessories (for example, soap dishes or lotion dispensers) have individual components made of glass. The material is pressed or mouth-blown and processed to a high standard. Glass is 100% recyclable and can be reused indefinitely without a loss of quality. This makes glass a very sustainable material.

Light mirrors Mirror cabinets

KEUCO light mirrors and mirror cabinets are made of aluminium in outstanding and durable KEUCO quality. They can work wonders when space is limited, with flexible interior fittings, glass or aluminium bases, high-quality mirroring inside and out, and innovative LED technology.

They are available in a wide range of formats for wall-mounted or recessed installation.

Aluminium

The hollow wall aluminium profiles are silver anodised. Aluminium is easy to machine and offers the advantage of high corrosion resistance and a very scratch-resistant surface, which makes the material very durable. Aluminium can also be used to achieve a lightweight design.

In principle, all anodised aluminium parts can be recycled. The recyclability of anodised aluminium parts is subject to very few restrictions compared to untreated aluminium.

Mirrors

A mirror made of silver-coated mirror glass is provided with a reflective silver layer on one or two sides, which is protected by a layer of copper as well as by layers of lacquer. Mirrors are generally recyclable.

Hinges

High-quality and three-dimensionally adjustable hinges with a soft-closing mechanism are installed.

LEDs

Working with its partners, KEUCO has consistently enhanced its forward-looking LED lighting technology for light mirrors and mirror cabinets to raise the bar in this field. In terms of brightness and colour fastness, the homogeneity of the light-emitting diodes is outstanding.

The light spectrum ranges from warm white with 2700 Kelvin to 6500 Kelvin for a daylight feel.

The service life is approx. 30,000 operating hours. The LED strips with plug connections can be replaced by qualified electricians. LEDs offer very high energy efficiency thanks to their low energy consumption. Our quality promise includes a 5-year warranty and 10-year supply of spare parts.

Furniture

With KEUCO furniture, design and technology are perfectly synced. We don't do run-of-the-mill. Based on their design specifications, functionality and price positioning, every KEUCO furniture range differs when it comes to design, drawer and fitting systems, dimensions and finishes.

KEUCO furniture has a high level of stability due to the powder-coated and corrosion-resistant steel suspension brackets.

KEUCO does not use standard handles. We always use products created in-house to complement the overall design.

Textured lacquer

Our textured lacquer is characterised by its matt, slightly textured and robust surface.

High-gloss lacquer

High-gloss lacquer is characterised by its particularly smooth and brilliantly glossy surface. The lacquer is applied in several layers and has the quality of piano lacquer.

Satin matt lacquer

Our satin matt lacquer is characterised by its velvety soft surface for the furniture body and a deep intensity of colour.

Decor

The decorative surface is matt and gives the furniture a unique feel and naturalness.

Veneer

KEUCO authentic wood veneers are glued onto a carrier plate made of whole wooden sheets. Wood is a natural product and therefore variations in colour and structure are possible due to nature. This makes every KEUCO piece of furniture unique.

Furniture with wood veneered surfaces is manufactured on order at KEUCO.

Glass

Glass is a modern material that is easy to look after, is not sensitive to external influences, and does not change as a result of light or its environment. Safety glass (ESG) offers an increased level of resistance to impacts.

Glass is 100% recyclable and can be reused indefinitely without a loss of quality, making it a very sustainable material.

Cover plates

Ceramic cover plates in a slate or marble look are inspired by nature. They are ideal for bathrooms due to their perfect flatness and dimensional accuracy as well as their high resistance to the effects of moisture and wear.

Drawers and hinges

In general, we use high-quality and adjustable drawer systems and hinges from market-leading manufacturers. KEUCO furniture is pre-adjusted before delivery.

Washbasins

KEUCO washbasins are perfectly coordinated with KEUCO furniture when it comes to colour and form. In addition to classic washbasin solutions, there are also large double or narrow guest washbasins. Available as attached or surface-mounted wash basins to suit your preferred taste and for the various fittings options with all tap hole variants and matching valve covers.

All KEUCO washbasin solutions are subject to the strictest quality requirements.

Varicor®

Varicor® washbasins from KEUCO are characterised by their warm, matt surface. The easy-care material meets the highest standards in terms of durability and hygiene.

The mineral material is easy to process and consists of natural minerals and resins, aluminium hydroxide and polyester resin. The washbasins are poured into a mould in liquid form, hardened at approx. 100°C and then ground.

Varicor® is robust, seamless, flame-retardant, hygienic, disinfectant-resistant, easy to clean and has a pore-free, velvet-like surface with a homogeneous colour finish.

The premium material Varicor® is particularly durable, can be repaired effectively and is also environmentally friendly thanks to its recyclability.

Ceramic

Our 'Made in Germany' ceramic consists of 50% raw clay and 50% fireclay.

KEUCO ceramic washbasins are unique in the plumbing industry. They are manufactured using the core casting process - poured into the mould in liquid form and cured at approx. 1,240°C for 1.5 days - before being glazed. KEUCO ceramic washbasins are characterised by particularly low shrinkage, which enables the highest possible level of precision to be achieved.

Each washbasin is coated with CleanPlus and additionally ground from the bottom.

A KEUCO ceramic washbasin is a natural, one-of-a-kind product.

Steel enamel

Steel-enamelled washbasins combine timeless design, high functionality and exceptional durability. The durable enamel surface is characterised by its scratch resistance, long-lasting UV resistance and resistance to cosmetics such as nail polish or makeup. These properties not only make them easy to maintain, but also ideal for use in the bathroom. Even after years of use, the material's distinctive appearance remains. In addition, the surface is particularly hygienic, as the hard and pore-free surface offers virtually no breeding ground for dirt and bacteria.
