A minimum drainage slope 1% (maximum slope of 4%) is ensured in all designs.

Anti-slip sandblasting surface treatment on Silestone shower trays means that the dark colours become lighter and the N-Boost treatment is lost in the patterns (in the case of Exelis, over its entire surface). For this reason, Cosentino does not recommend black colours, those coarse-grained or with high crystal content (Stellar White or Stellar Black)

⁽¹⁾ Size only available in colours with Jumbo slab: max. width 120cm, max. length 300cm.

The new framed shower tray in Dekton with a versatile and smart design, where the drain is covered in the same material to aim the perfect visual continuity in your bathroom space.

Arnolds additions

The assortment extends beyond washbasins and shower trays; Silestone or Dekton can cover nearly any surface. Here are several product ideas to enhance any bathroom: vanity tops for surface-mounted, under-mounted, or semi-recessed basins, window sills, niches, bath boxes, perimeters, and even shelves. These can be tailored to complement or contrast with your washbasin and shower tray, available in various colours across the Silestone and Dekton collections.
